BAKER AT LARGE.

BAKER AT LAKISE.

SUPERIOR COURT—SPECIAL TREE—Dec 31.—Before Judge
DAVIES.

BAKER DISCHARGED ON \$5,000 BAIL.

The People agt. Lewis Baker et al.

Lewis Baker was brought before Judge Davies this
morning in answer to the writ of habeas corpus granted

by Judge Clerke yesterday.

District-Attorney Hall, who attended on behalf of

the people, said that inasmuch as the prisoner had stood two trials, on which, taken together, twelve jurors had rendered a verdict of acquittal and the other twelve could'nt agree of what crime to find him guilty, and as the testimony on the second trial (which Mr. Hall pronounced to be impartial and the jury an excellent one) slightly varied from that given on the

first, he was not disposed to oppose the application. He was only anxious that the amount of bail be commensurate with the importance of the crime, and thought \$5,000 would be about right. That sum was accordingly fixed-Messra. Brady and Sickles, who appeared for the prisoner, making no opposition. Judge Davies then made the following indorsement

Judge Davies then made the following indorsement on the writ:

The prisoner, Lewis Baker, being brought before me, it is returned that he is held in custody by virtue of commitments upon an indictment charging him and Patrick M\*Laughlin, and James Turner, and John Hyler, and Cornelius Linn, jointly with homicide.

The District Attorney for the People, on an application next made to bail the said prisoner, consents to the same and consents that the joint defendants be considered as personally present with the said Lewis Baker), and by agreement I fix the said bail to be given in the sum of \$5.000 each, in good and sufficient surety, and thereupon that each of the said defendants, Lewis Baker, M\*Laughlin and Turner be discharged from constody. custody, Mr. John H. McCunn, of the firm of McCunn & Mon-

crief, presented himself as surety for Baker; but the District. Attorney objected that he was not such a person as was required by law, because an attorney and counsellor of the court in which the application was made. Mr. McCunn, however, in the course of an hour or

two, procured competent bail in the person of Mr. James McCrea, who justified in double the amount on which the prisoner is held. Baker was then discharged and received the congratulations of troops of friends among whom he had been waiting during the day. Satisfactory bail for Mesers, McLaughlin and Turner

was not procured, nor would it have availed if it had been, inasmuch as they are held under several indictments. The District-Attorney has, however, received notice of an application on their behalf, to be heard on Monday next before Judge Russell, City Judge elect-

DEATH OF A PROMINENT MAN.

Jacon M. Haldeman, whose death we noticed last week, was too prominent a man in all his quisities to be permitted to sink into the grave without some more extended notice than we have yet seen of him.

His fortune, the largest ever accumulated by any man in this section of our State, was the result of his own high capacity for business. He was born in bonegal Township, in the county of Lancaster. He has been in bonegal Township, in the county of Lancaster deep the father, a man of iron will and strong mind, was a native of the same township, and was a descendant of the many Huguenot refugees who came to Lancaster County from the Palatinate, to escape the Carbolic persecution following the revocation of the elict of Nantes. He was man of great enterprise, always for most in every work work calculated to benefit the public and setter his own fortune. From him, the son acquired all the maxims of wisdom, and the habits of self-control which led to his wonderful success, but from he him received no fortune, for the father died long after his own was earned.

More than sixty years are, when a boy of 15 or 15 years of are.

the son acquired all the maxims of wisdom, and the habits of self-control which led to his wonderful success, but from he him received no fettune, for the father died long after his own was earned.

More than sixty years ago, when a boy of 15 or 16 years of age, having been sent by his father and some capitalists in Philadelphia to purchase wheat in the neighborhood of Pittsburgh and inding it difficult to be transported in wagone east, he determined to seeks market by the Mississippi, and after obtaining permission from his employers, he commerced the building of flat boats, then an almost untried experiment, and took his wheat, many thousand bushels, to New Orleans—finding no market there, he put it on board ships and cruised among the West Indies until he sold it to advantage, and then returned with a handsome profit. For many years he was the agent of his father in purchasing the produce of the Juniata and Saquehanra countries, and conveying it in arks to Baltimore.

About 1805, in connection with his father, he rented a forge at the mouth of the Yellow Breeches Creek, and there his creat fortune was begun. The proprietor had failed, but Mr. Haldeman soon showed what industry and skill, well applied, could do. In a short time, he returned the money advanced by his father, with a profit of \$5,000, and took the works in his own hands. This was during the war with Great Britain, when the United States had no money and little credit. They needed iron for the manufactory of arms, at Harper's Ferry. The old ironmasters would not sell without money, but Mr. H. agreed to furnish all the iron his forge could make, on condition that Treasury drafts were furnished sufficient to pay his men. He continued the supply during the whole war, and without him, the solders actually would have been without guns. At the end of the was, he was paid-off in the resources of the country, for his drafts soon commanded par, and gave him capital to buy all the valuable real estate in his neighborhood. He was a liberal patron of industr

WEDNESDAY, Dec. 31-P. M. The strong feeling of the Stock market continues, with a fair amount of business doing. There is no new feature to notice, excepting, perhaps, some reduction in the difference between cash and buyers' option transactions. The Bears do not appear disposed to act with any energy, and the general impression appears to be that January will show a rising market. Eric closes at 62 # 624. The receipts of the mouth will probably reach \$675,000. Reading is 87 287 1. Our advices from Philadelphia lead us to conclude that the dividend, unless the programme is changed, will be 4 per cent in cash, and no scrip dividend. This will leave a very respectable surplus. Central is strong at 931 2931. In Western shares, the market gene rally is well sustained, with a fair demand. Illinois Central continues buoyant, with considerable transactions, and sold as high as 123 regular, and 1:33 buyer thirty, an advance of 1 P cent. The confidence in the future of this stock, especially abroad, appears to be now firmly established. Toledo was also firm, and advanced to 754, closing at 74; 275. Galena was 1181 2119. Michigan Southern was rather heavy at 87]. Illinois Central bonds continue firm, but are not active, selling at 972. Erics, 1875, sold at 94; 24 Mortgages, 97, &c. State Stocks are heavy. The

The interest due on the 1st proximo on the bonds of the Lackawanna and Bloomsburg Railroad Company will be paid at the Mercantile Bank of this city. This road, connecting at Scranton with the Delaware, Lackawanna and Western Railroad, and at Rupert, two miles south of Bloomsburg, with the Catawissa, Williamsport and Eric Road, is rapidly progressing to completion. The rails are already laid from Scranton to Nanticoke, about 25 miles, and has been in operation for passer ger travel principally to Kingston, opposite Wilkesbarre, Penn., about 18 miles, since the last of June, earning about \$4,000 ? month. The grading and bridging of the remainder of the line will be com-

pleted by the 1st of May. The interest on the Milwaukee City bonds, issued to aid in the construction of the Milwaukee and Horicon Railroad, falling due Jan. 2, 1857, and the interest on the Farm mortgage bonds of said Company, falling due Jan. 1, will be paid on presentation of the coupons

at the Bank of the Republic. The steamer from Boston to-day took \$273,000 in gold. The Fulton brings \$103,700 in doubloons, in-

tended for Havana. Messes. Duncan, Sherman & Co., have concluded a negotiation with Messrs. H. A. Johnson & Co., the takers of the new Ohio loan, for a million of dollars of the loan. This negotiation is on account of the English correspondents of Messrs. Duncan, Sherman & Co. The Fulton brings \$400,000 of the old loan, sent home for redemption on the 2d Jan., when it matures. The new loan has been sold to considerable extent at 107, but will now be advanced to 108.

The suspension of the Eric City Bank, which has been announced in some of the journals, is not a fixed

The year goes out with some relief in the Money Market, compared with previous days, although the stringency is still marked, and more than legal interest is paid on stock loans in many cases. There will, undoubtedly, be some relief after the 1st instant, but we think much less than is generally anticipated. The disbursements of the first days of the year will be very large, reaching an aggregate of probably of \$8,000,000 in interest, dividends, and principal. This includes about \$660,000 interest on the Public Debt, \$3,500,000 by the Ohio Trust Company in principal and interest of the debt of Ohio, &c., \$1,100,000 by Winslow, Lanier & Co., \$330,000 by the Bank of the Republic for the interest on the debt of Virginia, \$122,500 by the Erie Company, and large sums by Duncan, Sherman & Co., Clark, Dodge & Co., Atwood & Co., &c., for railroad interest, and by the banks and insurance companies. As far as we can learn there has never been an interest paying season arrive when the railroads of the West have responded with so much promptness and with so little necessity for recourse to loans for the payment of their coupons. This is a gratifying evidence of the favorable condition of their traffic and the general good management.

The business of the Clearing House was to-day \$26,646,000.

The Circuit Court of Washington (D. C.) has decided that the \$60,000 due the General Government by Messrs. Selden. Withers & Co , must be paid out o the assets of the house before the general creditors receive any dividend.

The Fulton, with four days' later intelligence, brings a slight decline in Consols, and a great heaviness in the Paris Bourse. The Money markets were unchanged. Breadstuffs were : wy, and Cotton firm.

The Times of the 17th, the latest date, says:

The English funds remain comparatively unaffected by the great heaviness on the Pans Bourse, and have closed to-day at a recovery of † v cent. Consols for January opened at "3½ to ½ ex diviviend, and the last efficial transactions were at 33½ to ½. After regular hours however, the market was less strong. The smount of business transacted during the day was again very small. Money on Government securities was in good supply at former rates.

In the discount market to day there was again an active demand, and the advances obtained from the Bank of England were likewise large.

The closing quotations of the French Three V Cents on the Paris Bourse this evening were 66f. for money, and 66f. 30c. for the end of the month, showing another decline of ½c. A fall of more than 2 V cent has thus been witnessed since the early part of the month. Neither the tone of the financial letters nor the position of the Bank of Vance is such as to offer any explanation of it. The Times of the 17th, the latest date, says:

of the Bonk of Taken obligations amounting to between tion of it.

The issue of fresh obligations amounting to between £2,000,000 and £3,000,000 by the Strasburg and Western of France Railways, which are to be paid in full within three months, may probably have had some influence in causing the movement, and there are reports the Government being likely to want money. The

of the Government being likely to want money. The dispute between Prussia and Switzerland likewise seems to be viewed with a little uneasiness.

About £10 600 in gold was taken from the Bank today for transmission to the Continent, in payment probably for 5f. pieces, the demand for which has partially revived since the arrival of the Indian mail.

The commercial accounts from India to-day are generally ferevable. At Calcutta large sales of manufacerally favorable. At Calcutta large sales of manufac-tured goods had been effected at full prices. Three days later intelligence had been received from China,

and the rate of Exchange at Shanghae still presented a declining tendency, the quotation being 7/6 27/7. The News says:

In the Stock Exchange to-day, the principal business was in connection with the fortnightly settlement in sheres and foreign stocks. Although this operation occasioned an increased demand for money throughout the house, the various markets evinced great standiners. The funds experienced little variation, and clead exactly the same as on Saturday. Although the The News Pays: comme ai demand for money continues active, as usual at this period of the year, first class bills can be usual at this period of the year, first class bills can be discounted in most quarters at a slight reduction from the Bank minimum. The market "out of doors" was, upon the whole, a little firmer to day, owing to the temporary demand for stock suchange purposes. Nevertheless, we have still to report a growing impression, in well-informed quarters, that a reduction in the Bank rate is at hand. Many parties are languing that the measure will be adopted next Thursday, the ensuing Thursday being Christmas day. It is also thought highly probable that measures of relaxation will be specificly adopted by the Bank of France, although the fall on the Paris Bourse to-day requires explanation.

The return from the Bank of England for the week
